

Environmental Policy – Selikor NV

Selikor NV is responsible for the management of the majority of solid waste generated on Curaçao.

We strive to minimize and prevent environmental impacts from our business activities as much as possible and we commit ourselves to comply with all Curaçao and Netherlands Antilles environmental laws and regulations, including the provisions of our nuisance permit. Furthermore, we strive to comply with international environmental laws and regulations for matters that are not (yet) defined in local laws and regulations and that are relevant and applicable to the situation on Curaçao.

Our environmental policy is oriented to managing waste in a sustainable and environmentally responsible manner. Important aspects of our environmental policy are:

- Minimize and prevent soil, air, and water contamination as much as possible
- Minimize and prevent nuisances to the surrounding inhabitants/to our neighbors as much as possible
- Optimal land use
- Use energy, water, and other resources efficiently
- Implement waste prevention and recycling within Selikor as much as possible
- Employee safety

Our environmental objectives concretize this environmental policy and these objectives are reviewed annually. In this manner Selikor assures continuous improvement to reduce environmental effects and to prevent them whenever possible.
